DETAILED ACTION

Response to Arguments

- 1. Applicant's arguments based on to the amendment filed 02/15/2007, with respect to the prior art rejection have been fully considered and are persuasive. The 35 USC \$102 and \$103 rejections of claims 1-18 have been withdrawn.
- 2. The drawings were received on 02/15/2007. These drawings are acceptable.
- 3. The objections to the specification are maintained. The newly submitted Abstract is under 50 words, the specification continues to lack the appropriate headers, and there continues to be improper treatment of trademarks in the specification.

Specification

4. The abstract of the disclosure is objected to because it contains less than 50 words. Correction is required. See MPEP § 608.01(b).

Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

Application/Control Number: 10/814,781 Page 3

Art Unit: 2182

5. The specification is objected to due to the lack of headings and arrangement of the sections. Below summarizes the preferred arrangement of the specification by the Office.

Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) THE NAMES OF THE PARTIES TO A JOINT RESEARCH AGREEMENT.
- (e) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC.
- (f) BACKGROUND OF THE INVENTION.
 - (1) Field of the Invention.
 - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (g) BRIEF SUMMARY OF THE INVENTION.
- (h) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (i) DETAILED DESCRIPTION OF THE INVENTION.
- (i) CLAIM OR CLAIMS (commencing on a separate sheet).
- (k) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (I) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).
- 6. The use of the various trademarks has been noted in this application, i.e., pages 10 and 12. It should be capitalized wherever it appears and be accompanied by the generic terminology.

Application/Control Number: 10/814,781

Art Unit: 2182

Although the use of trademarks is permissible in patent applications, the proprietary nature of the marks should be respected and every effort made to prevent their use in any manner, which might adversely affect their validity as trademarks.

Claim Rejections - 35 USC § 112

- 7. The following is a quotation of the second paragraph of 35 U.S.C. 112:

 The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 8. Claims 1-9 and 11-21 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The term "substantially" in claims 1,9,12 and 17 is a relative term which renders the claims indefinite. The term "substantially" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention. The Examiner recommends quantifying the term by using inequalities or fixed numbers to define how close to the original frame rate the invention is trying to restore. To expedite prosecution, Examiner will assume the applicant means to restore the original frame rate in entirety.

The remaining claims are rejected based on being dependent upon the above rejected claims.

Allowable Subject Matter

Application/Control Number: 10/814,781

Art Unit: 2182

9. Claims 1-9 and 11-21 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

The following is the statement of reasons for the indication of allowable subject matter: The prior art disclosed by the applicant and cited by the Examiner fail to teach or suggest, alone or in combination, **all** the limitations of the independent claim(s) (claims 1 and 12), particularly a device and method of transmission of compressionless video data through a data link between a host device and a remote device and decompressionless production of video data, wherein the remote device reproduces a frame up to n times to restore the original frame rate.

- 10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Patents and patent related publications are cited in the Notice of References Cited (Form PTO-892) attached to this action to further show the state of the art with respect to reducing frame rates in order to send video data remotely.
 - US Pat. No. 6,522,352 to Strandwitz et al. discloses reducing the frame rates of video capture devices in order to accommodate for limited bandwidth (Column 10, lines 5-15). However, Strandwitz et al. discloses use of compression methods (Column 3, lines 9-15).
 - US Pat. No. 6,631,240 to Salesin et al. discloses lowering the frame rate due to limited bandwidth and the consequences of doing so (Column 13, lines 9-20).
 Salesin et al. does not disclose using compressionless/decompressionless transmission.

Application/Control Number: 10/814,781 Page 6

Art Unit: 2182

US Pat. Pub. No. 2004/0078822 to Breen et al. discloses lowering the frame rate
due to limited bandwidth (paragraph 101). Breen et al. does not disclose using
compressionless/decompressionless transmission. Also, the lowering of the
frame rate in Breen et al. is for effects such as fast-forward, which is not what the
instant application intends.

Conclusion

11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alan S. Chen whose telephone number is 571-272-4143. The examiner can normally be reached on M-F 9-5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kim N. Huynh can be reached on 571-272-4147. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
